

Getting More Functionality out of Annotations

Andrejs Doronins

TEST AUTOMATION ENGINEER

@Test Field

```
@Test(description = ...,  
        expectedException = ...,  
        timeout = ...,  
        ... )
```

Timeout

DO

Use to unblock testing

DON'T

Use for performance testing

```
@Test(enabled = false)  
public void flakyTest()  
  
}
```

```
@Test(description = "")
```

```
public void testX(){}  
  

```

```
@Test(timeout = 1000, expectedException = <>)
```

```
public void testY(){}  
  

```

```
@Test(enabled = false)
```

```
public void testZ(){}  
  

```

```
@AfterMethod(alwaysRun = true)
```

```
public void cleanup(){}  
  

```
